PROFILE SUMMARY

Full-stack developer experienced in building scalable web applications with React, Node.js, MongoDB, and REST APIs. Interested in developing production-ready systems and applying AI/ML to real-world solutions. A continuous learner focused on improving technical skills through hands-on development and practice.

PROJECTS

KAAPAAAN-TRAFFIC VIOLATION INDICATOR

Developed KAAPAAAN, an AI-powered traffic violation detection system using the MERN stack. Integrated YOLOv8 and OpenCV to detect violations like no helmet, mobile usage, triple riding, and stunt riding in real time. Built a low-latency pipeline with WebSockets and REST APIs to generate automated alerts with evidence, enabling efficient and data-driven traffic enforcement.

SRI - AI and ML enabled video analysis and interpretation(SIH-2025)

Developed an AI/ML-powered video analysis system for real-time suspect tracking, weapon detection, and suspicious behavior recognition. Leveraged instance-level summarization and pattern matching to reduce 1-hour video processing time to ~20 minutes. Built on an agentic microservices architecture integrating 7+ AI/DL modules for scalable, low-latency intelligence.

SAFE WAVE-AI Based Smart Drowning Detection & Rescue System (PALS-2026)

Developed an AI-enabled wearable system for real-time drowning detection and rescue. Monitors body signals using multiple sensors and automatically triggers airbag deployment and GPS-based alerts. Enables quick rescue response through live tracking and emergency notifications, improving safety in water environments.

REAL TIME APPLICATIONS

Developed and deployed real-time business applications, including a live e-commerce platform for Evan's Luxe Beauty to sell plant-based cosmetics online, a professional company portfolio website for Adler Contracts to showcase projects and company details, and an advance meat booking application that allows customers to pre-book meat orders from local shops efficiently. These working digital solutions improved customer engagement, streamlined business operations, and provided practical, user-friendly experiences tailored to real business needs.

WORK EXPERIENCES

App Developer-Application Development Hub,CSE Dept.,Nandha Engineering College

Worked on integrating AI modules into full-stack applications and contributed to research, UI design, and development of scalable web and mobile projects.

Full Stack Developer (Intern) - Mahat Labs Pvt Ltd

Developed full-stack application prototypes and automated basic business workflows during a fast-paced 28-day internship, gaining hands-on experience in rapid application development.

EDUCATION

Nandha Engineering College

Bachelor of Engineering in Computer Science and Engineering - CGPA : 8.1

Nov 2023 - Present

Erode, Tamilnadu

TECHNICAL SKILLS & TOOLS

- **Languages:** Java, Python
- **Frontend:**React.js, HTML, CSS
- **Backend:**Node.js, Express.js, REST APIs, WebSockets
- **Stacks:** Full-Stack
- **AI / Computer Vision:** PyTorch, OpenCV, YOLOv8, MTCNN
- **Databases/Cloud:** PostgreSQL, MongoDB, Google Cloud, Cloudinary, Firebase.
- **Tools & Platforms:** GitHub, GitHub Actions, Jenkins, Docker, VS Code, AWS, Gradle, Render

ACHIEVEMENTS

- **Winner – Kaaval Hackathon**, conducted by TN Startup and Kanyakumari Police.
- **Grand Finalist – Smart India Hackathon 2025**, Oriental University, Indore, Madhya Pradesh.
- **IEEE Author**, published a research paper on **AI-based traffic surveillance and verification systems**.
- **Patent Filed: Edge-Based Unified AI Agent for Autonomous Surveillance Behavior Analysis and Risk-Driven Response**.
- **Active Hackathon Participant**, participated in multiple national-level hackathons gaining hands-on experience in rapid problem solving and team collaboration.
